# CraZy CarZz

Vincent Nguyen, Alexander Epifantsev, John Bestavros, Allen Jang

### **Problem Definition & Objective**

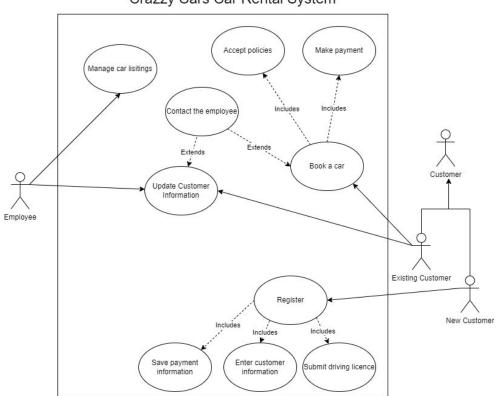

We created a software that allows customers to be able to search and reserve cars for hire.

Our objective is for an owner of a car rental business to have a software with the following functionality:

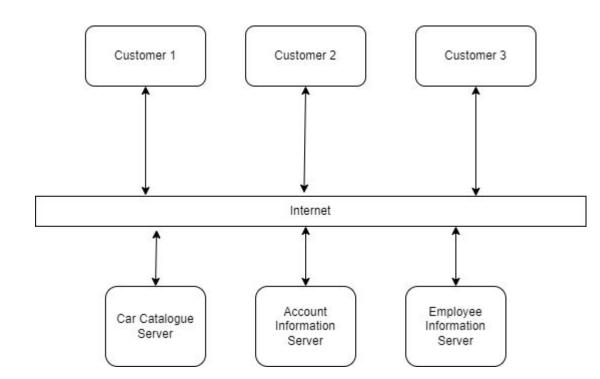

- 1. Login and registration on system software
- 2. Online verification of a driver's license
- 3. Ability to search for car models, rental prices, car type, and location
- 4. Extend rental time
- Pick a return location in advanced, keep the car reserved until car is returned
- 6. Make a payment for car rental online
- 7. Contact a company employee with regards to any issues (i.e. car accident)

## Use case & system capability

Crazzy Cars Car Rental System

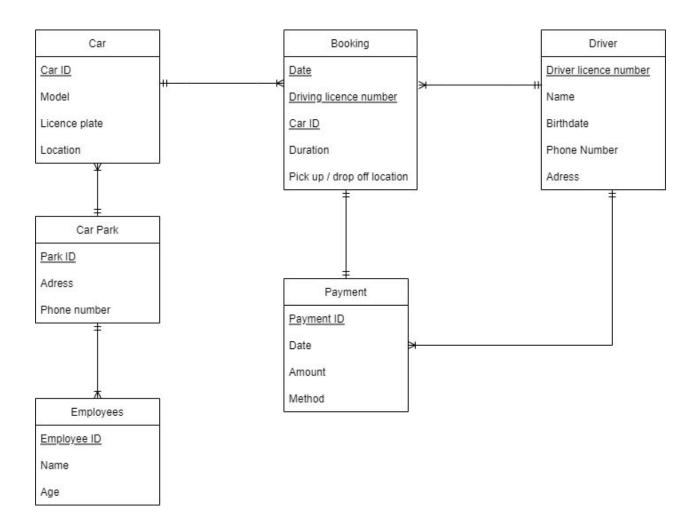

## System architecture
